

## **ENVIRONMENTAL POLICY STATEMENT**

Of

### **Simkiss Group of Companies**

Simkiss Group develop, integrate, manufacture, install and commission Mechanical and Electrical Control Systems for industrial process equipment. The company recognises the need to balance their effective operations against minimising the damage to local and global environments.

Simkiss Group are committed to minimising the impact of their operations on the wider environment within financially practical limitations. The Environmental Policy is based upon the international Environmental Management System standard ISO14001. As outlined in the standard the company is committed to the following:

Compliance with all current legislation relating to the environment.  
Reducing pollution to the environment.  
The review and continued improvement of company practices.  
To share this policy with employees, shareholders and customers.

#### **Simkiss Group - Key objective areas:**

- 1. To reduce the amount of electricity used.**
- 2. To design and manufacture equipment using best environmental practice.**
- 3. To minimise the use of pollution causing agents.**
- 4. To uphold and improve the employee environmental awareness programme.**
- 5. Ensure that contractors and employees operate to acceptable environmental standards.**
- 6. To respond to customer's environmental requirements.**
- 7. To build upon our current good practice and develop an environmentally sound business culture.**

These objectives will be reviewed as the changing need of the business demands or every 12 months whichever comes first, to ensure continual improvement.
